

# Errata for Master's Thesis: Foundations of an adaptable container library

Bo Simonsen  
bo@geekworld.dk

February 1, 2010

In this document, known errors related to the Master's Thesis *Foundations of an adaptable container library* by Bo Simonsen are listed. If you find additional errors please report them to me by e-mail.

## 1 Front matter

Frontpage: Title in Danish is missing, should be *Fundamentet for et fleksibelt container bibliotek*.

## 2 Chapter: Background

*Thanks to Jens Svensson for sending me these errors.*

p. 4, 2 paragraph (3. Polymorphism): peaces → peices.

p. 15, code example, `random_number_generator::operator()` should be:

```
1  template <typename T>
2  class random_number_generator {
3  public:
4      ...
5      T operator()() const {
6          T tmp = rand() % (*this).max;
7          if(tmp == 0) {
8              return 1;
9          }
10         return tmp;
11     }
12     ...
13 };
```

## 3 Paper: Applying design patterns to specify the architecture of a generic program library

None yet.

## **4 Paper: Adaptable component frameworks**

None yet.

## **5 Tech report: Towards better usability of component frameworks**

p. 121, 1st paragraph: phrase → phase, appear → appears.
